PROFILE SUMMARY

Machine Learning and Full-Stack developer focused on building end-to-end intelligent systems. Experienced in ML model benchmarking, imbalanced data handling, and deploying scalable web applications with real-time inference and analytics.

EDUCATION

B.Tech in Computer Science and Engineering

JK Lakshmipat University

2024 – Present

CGPA: 8.54

Visiting Undergraduate Student

Indian Institute of Technology Kanpur (IIT Kanpur)

Jan 2026 – May 2026

- Selected for competitive academic exchange program
- Advanced coursework in computer science and system-level problem solving

SKILLS

Programming: C, C++, Python, JavaScript

ML/AI: Scikit-learn, XGBoost, LightGBM, CatBoost, Feature Engineering, Model Evaluation

Web: Flask, React.js, HTML, CSS

Database: SQLite, MongoDB

Tools: Git, GitHub, VS Code

WORK EXPERIENCE

Data Science Intern – Veracitiz

May 2026 – Present

- Built data preprocessing pipelines and performed EDA on structured datasets for ML workflows
- Applied feature engineering techniques to improve model-ready data quality
- Supported ML model development through structured data preparation and analysis

PROJECTS

Stroke Risk Prediction System — Full-Stack ML Project

- Built a clinical ML system to predict stroke risk using structured patient health data with severe class imbalance
- Trained and benchmarked multiple models including Logistic Regression, Random Forest, XGBoost, LightGBM, and CatBoost
- Implemented class imbalance handling using threshold tuning and probability calibration for improved minority-class detection
- Developed Flask REST APIs and React dashboard for real-time inference, batch processing, and analytics visualization
- Achieved ROC-AUC 0.82–0.89 and built SQLite-based storage with downloadable CSV/PDF reports

Network Intrusion Detection System

- Developed ML-based system for detecting malicious network traffic
- Implemented Random Forest and SVM models for classification
- Processed large-scale datasets for anomaly detection and evaluation

ACHIEVEMENTS & CERTIFICATIONS

- Visiting Undergraduate Student – IIT Kanpur (Jan 2026 – May 2026)
- Vice Chancellor's Honor List – Academic Excellence
- OpenAI x NxtWave Buildathon – Recognized for system design innovation
- Technical Team Member – HackJKLU 4.0
- Certifications: Python for Everybody, Exploring C, Generative AI Workshop
